Patrick,
The signage needs to be furnished and installed by the GC.

If this will hold the permit issuance set, we can catch this up later. I think that we need to discuss the schemes and numbering format.

Thanks

Josh, thank you for clarifying. So FERC will coordinate signage installation at 999. Please advise if there is anything you will need to OTJ, such as PDF/CAD drawings of the space for use by your Architect/GC.

The signage is being handled through the general contractor for the HQ. Attached is the design information we have.

Josh,

Please send the contact information from your signage vender as well. We can include their product as part of the solicitation package to ensure it is the same as being used at the HQ. Can you reach out to them to give them a heads up that this may be coming? Thanks.

Josh, do you have a sign design from your signage vender? I can incorporate that information into the solicitation package as part of the bidding process.

Patrick,

I'm all booked next Wednesday. Is Tuesday or Thursday afternoon OK? Around 1:30k

FERC Team?

Good morning Josh,

I would like to check the status of the Design Review for the 100%CD's FERC Swing.

Thanks
